Location: Bucharest, Romania

## ABOUT ME

---

Third-year Mathematics and Computer Science student passionate about programming and continuous learning. Strong interest in Python and Artificial Intelligence, combined with hands-on experience in systems, automation, and backend environments. Eager to build scalable solutions and grow in a technical role focused on Python and AI technologies.

## EDUCATION

---

**University POLITEHNICA of Bucharest** | *Bachelor's Degree – Applied Science*      **2023 – Present**

- Specialization: Mathematics and Computer Science
- Relevant coursework: Python, MySQL, C++, MATLAB

**Liceul Borșa** | *High School Diploma – Mathematics and Computer Science*      **June 2023**

- Romanian Baccalaureate Diploma
- Programming Competency Certificate

## PERSONAL PROJECT

---

**Scripter & System Administrator**      **PKBCRAFT, Bucharest | Feb 2021 – Oct 2025**

PKBCRAFT Romania is a community-driven project focused on delivering a stable and engaging Minecraft experience through high-performance infrastructure and system-level optimizations.

- Improved server performance and reduced latency by up to 30% through OS and JVM tuning, ensuring stable gameplay even under peak load.
- Increased system uptime to 99.9% by continuously monitoring and optimizing VPS and dedicated server infrastructure (CPU, memory, storage, network).
- Strengthened platform security by implementing firewall rules, IDS/IPS systems, and automated backup policies, reducing risk of data loss and unauthorized access.
- Automated maintenance, backup, and update processes using Bash scripting, reducing manual workload by 40% and minimizing operational errors.
- Deployed and maintained core services (MySQL, Redis, custom plugins), ensuring long-term stability and cross-version compatibility.
- Designed and maintained CI/CD pipelines with automated testing and versioning, streamlining release cycles and reducing deployment issues.
- Implemented monitoring and alerting systems (Grafana, Prometheus, centralized logging), enabling faster incident detection and response.
- Provided L1–L2 technical support and developed internal documentation, improving team efficiency and onboarding speed.
- Collaborated with developers and system administrators to deliver scalable solutions aligned with DevOps best practices.
- Contributed to infrastructure strategy and reliability improvements, increasing overall platform stability and user experience.

---

## VOLUNTEERING

---

### Undergraduate Teaching Assistant

UNSTPB | Jan 2025 – Jun 2025

- Supported groups of ~15 students per lab session in understanding Object-Oriented Programming (C++).
- Explained theoretical concepts and guided students through practical assignments and debugging processes.
- Facilitated laboratory sessions by breaking down complex topics into clear, accessible explanations tailored to different learning levels.
- Provided personalized feedback to improve students problem-solving skills and code quality.

## SKILLS & TOOLS

---

### *Technical Skills*

- Linux (Debian, Ubuntu)
- Bash scripting
- Python, C++ and Java
- OOP, Algorithms & Data Structures
- CI/CD (Git, GitLab)
- MySQL
- Monitoring (Prometheus)
- Jupyter Notebook

### *Other Skills*

- Jira, Confluence
- Testing & Debugging
- Technical Documentation
- Cross-functional Collaboration

### *Languages*

- Romanian – Native
- English – B2

## CERTIFICATIONS / COURSES

---

### Complete Python Developer: Zero to Mastery

Udemy | In Progress, 2026

### Data Structures and Algorithms in Python

Udemy | In Progress, 2026

### Atestat Profesional în Informatică

Liceul Borșa | 2023

- High school-level professional certification in Computer Science, demonstrating proficiency in programming and IT fundamentals.
